

Ophthalmology Instruments

INSTRUMED (PVT.) Ltd. was established in 1947, by our founder Mr. Ejaz Ahmed Chatha (Late). He was a true visionary and foresighted businessman, who began his career in the very old family business and served as director at Hilbr (Pvt.).

"Businesses require 'Continuous Professional Development' at each activity process to ensure quality growth in its operations. We utilise the years of experience with assistance of the information technology to evaluate and improve year by year. Our aim is to supply our customers with best quality and to bring revolutionary solutions to healthcare industry. We are confident that with our carefully selected team, and their hardwork, we would be able to reach our target and become the best possible source for healthcare equipment from Sialkot, Pakistan."

*Kamran E. Chatha, CEO
INSTRUMED (PVT) LTD.*

INSTRUMED has exported its Instruments in over 30 countries of the world. Our instruments satisfy our clients entirely. INSTRUMED is certified under ISO 9001:2008, ISO 13485:2003 and CE. Our company is registered with k-FDA (south korea), MOHL in Japan, MOH - Iran, MOH Egypt. Our company is keen in exploring different markets and looks forward to expand further.

INSTRUMED is located in sialkot, the industrial Hub of the province of Punjab. Company Premise is a 3 storey building, in a covered surface area of 10,900 Square Feet, located within the Small Industrial Estate of Sialkot, INSTRUMED has wide variety of stock and dedicated E RP solution maintain the R.O.Q to assist in speedy deliveries.

INSTRUMED has recently launched its specialized **OPHTHALMOLOGY** Range Catalogue because of the increasing demand of customers. Accommodating wide variety of supplies used by doctors and surgeons in their normal practices, addressing the surgical instruments need.

INSTRUMED
(Pvt.) Ltd.

CARE & HANDLING OF

SURGICAL INSTRUMENTS

To our customers:-

Concerning your question why staining, pitting or rusting can develop in stainless steel instruments: there are some basic points for the care and handling of surgical instruments which will extend the life of the instrument, eliminate staining or corrosion and lower the cost in use.

These are as follow.

1. Instruments should be rinsed as soon possible after use to remove blood, serum and saline .Do not use a sponge basin as any residue from normal saline solution can cause corrosion to develop over a period of time.
2. Instruments should be thoroughly dried after cleaning and before wrapping or storing, as moisture left in the box lock or serrations can cause rust or corrosion to develop.
3. Do not leave instruments in a cold sterilization soak solution for extended period as these solutions tend to be corrosive, after cold sterilization, rinse the instruments in distilled or demineralized water and dry thoroughly.)
4. If using cold sterilization technique, change the solution according to directions as prolonged use will cause the solution to become corrosive.
5. Do not use caustic cleaners or any other cleaner except those specified for surgical instruments.
6. Do not clean instruments with steel wool or scouring powder ,or use high PH detergents. If cleaning by hand, use a specific instrument cleaner or a natural detergent soap and soft brush (rinse with demineralized or distilled water)
7. Check your autoclave iron, sodium, calcium, magnesium or copper in your water can cause spotting, staining or corrosion to occur. in hard water areas, clean the line deposits from your autoclave, install a steam fitter if possible. it will remove most of dirt, rust and pipe scale.
8. Make sure your instrument wraps are rinsed sufficiently (6 to 8 times) by the laundry to remove all chlorine bleach as any residue can cause staining or corrosion during autoclaving.
9. Do not leave instruments in the following solution for extended periods as corrosion can result:-
 - a) Aluminum, Barium, Calcium, Ferrous or stannous chloride solutions.
 - b) Phenol, Lysol or Iodine.
 - c) Dakin's solution or zephiran.
 - d) Any Acid, mercury or potassium solution.
10. Do not sterilize stainless steel instruments with chrome plated instruments if possible, as any breach in the surface of the chrome plate will allow an electrolytic action develop between the dissimilar metals, causing plating and /or a rusty appearance to develop.
11. Preheat instruments in autoclave before allowing steam to enter, if possible, to prevent an excessive amount of condensation forming on the surface of the instruments.
12. Don't open the autoclave too quickly after the sterilization cycles as excessive condensation will develop on the surface the instruments(crack the door to allow drying before opening fully)

If you follow the above rules and use instrument cleaners and lubricant milk, your instruments should remain rust, spot and stain free. I hope this will answer any questions you might have on this topic.
